A
signal amplitude 1.0
signal amplitude 0.3
simulated groups (n)
adversarial dose λ
feasibility boundary
mean R
B
boundary verified with five seeds
(white dots: individual seeds)
worst repair cell: mean R (5 seeds)
damage threshold 0.86
signal amplitude / simulated groups
C
sibling-slice inflation: slice-level CV
overestimates transfer
τ (severity label)
slice-level LOO
donor-level LDO
k=8
k=4
k=2
(k = slices per donor)
